

Model SR6200 User Guide

AV Surround Receiver

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING

**TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK,
DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.**

**CAUTION: TO PREVENT ELECTRIC SHOCK, MATCH WIDE
BLADE OF PLUG TO WIDE SLOT, FULLY INSERT.**

**ATTENTION: POUR ÉVITER LES CHOCS ÉLECTRIQUES,
INTRODUIRE LA LAME LA PLUS LARGE DE LA FICHE DANS LA
BORNE CORRESPONDANTE DE LA PRISE ET POUSSER
JUSQU’AU FOND.**

NOTE TO CATV SYSTEM INSTALLER:

This reminder is provided to call the CATV (Cable-TV) system installer’s attention to Article 820-40 of the NEC, that provides guidelines for proper grounding and, in particular, specified that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by tuning the equipment off and on, the user is encouraged to try to

correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE:

Changes or modifications may cause this unit to fail to comply with Part 15 of the FCC Rules and may void the user’s authority to operate the equipment.

IMPORTANT SAFETY INSTRUCTIONS

READ BEFORE OPERATING EQUIPMENT

This product was designed and manufactured to meet strict quality and safety standards. There are, however, some installation and operation precautions which you should be particularly aware of.

1. Read Instructions - All the safety and operating instructions should be read before the appliance is operated.
2. Retain Instructions-The safety and operating instructions should be retained for future reference.
3. Heed Warnings-All warnings on the appliance and in the operating instructions should be adhered to.
4. Follow Instructions-All operating and use instructions should be followed.
5. Cleaning-Unplug this video product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
6. Attachments-Do not use attachments not recommended by the video product manufacturer as they may cause hazards.
7. Water and Moisture-Do not use this video product near water-for example, near a bath tub, wash bowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, and the like.
8. Accessories-Do not place this video product on an unstable cart, stand, tripod, bracket, or table. The video product may fall, causing serious injury to a child or adult, and serious damage to the appliance. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the video product. Any mounting of the appliance should follow the manufacturer's instructions, and should use a mounting accessory recommended by the manufacturer.
9. Ventilation-Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the video product and to protect it from overheating, and these openings must not be blocked or covered. The openings should never be blocked by placing the video product on a bed, sofa, rug, or other similar surface. This video product should never be placed near or over a radiator or heat register. This video product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer's instructions have been adhered to.
10. Power Sources-This video product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your appliance dealer or local power company. For video products intended to operate from battery power, or other sources, refer to the operating instructions.

11. Grounding or Polarization-This video product is equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

AC POLARIZED PLUG

12. Power-Cord Protection-Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance.
13. Protective Attachment Plug - The appliance is equipped with an attachment plug having overload protection. This is a safety feature. See Instruction Manual for replacement or resetting of protective device. If replacement of the plug is required, be sure the service technician has used a replacement plug specified by the manufacturer that has the same overload protection as the original plug.
14. Outdoor Antenna Grounding-If an outside antenna or cable system is connected to the video product, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built up static charges. Section 810 of the National Electrical Code, ANSI/NFPA No. 70-1984, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure 1.
15. Lightning-For added protection for this video product receiver during a lightning storm, or when it is left un-attended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the video product due to lightning and power-line surges.
16. Power Lines-An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal.
17. Overloading-Do not overload wall outlets and extension cords as this can result in a risk of fire or electric shock.
18. Object and Liquid Entry-Never push objects of any kind into this video product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the video product.

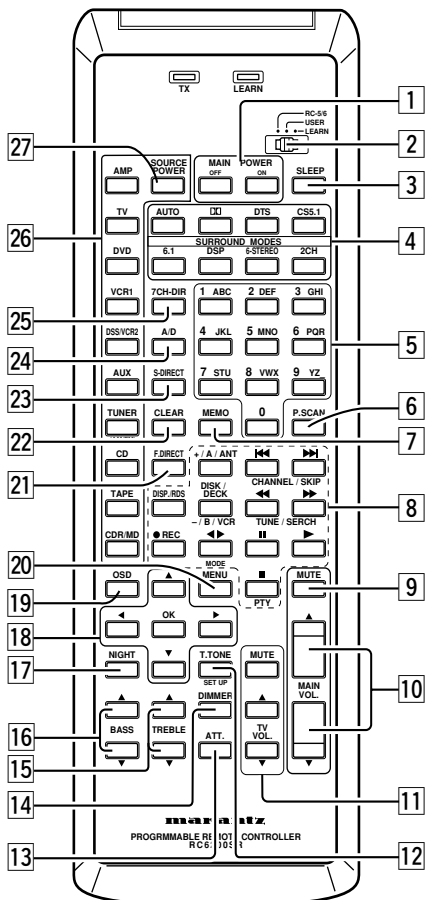

19. Servicing-Do not attempt to service this video product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.
20. Damage Requiring Service-Unplug this video product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
 - a. When the power-supply cord or plug is damaged.
 - b. If liquid has been spilled, or objects have fallen into the video product.
 - c. If the video product has been exposed to rain or water.
 - d. If the video product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the video product to its normal operation.
 - e. If the video product has been dropped or the cabinet has been damaged.
 - f. When the video product exhibits a distinct change in performance-this indicates a need for service.
21. Replacement Parts-When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.
22. Safety Check-Upon completion of any service or repairs to this video product, ask the service technician to perform safety checks to determine that the video product is in proper operating condition.
23. Carts and Stands-The appliance should be used only with a cart or stand that is recommended by the manufacturer.
24. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

INTRODUCTION

Thank you for purchasing the Marantz SR6200 DTS/Dolby Digital Surround receiver.

This remarkable component has been engineered to provide you with many years of home theater enjoyment.

Please take a few minutes to read this manual thoroughly before you connect and operate the SR6200.

As there are a number of connection and configurations options, you are encouraged to discuss your own particular home theater setup with your Marantz A/V specialist dealer.

DESCRIPTION

DTS was introduced in 1994 to provide 5.1 channels of discrete digital audio into home theater systems.

DTS brings you premium quality, discrete multi-channel digital sound to both movies and music.

DTS is a multi-channel sound system designed to create full range digital sound reproduction.

The no compromise DTS digital process sets the standard of quality for cinema sound by delivering an exact copy of the studio master recordings to neighborhood and home theaters.

Now, every moviegoer can hear the sound exactly as the moviemaker intended.

DTS can be enjoyed in the home for either movies or music on DVD's, LD's, and CD's.

Dolby Digital lets you enjoy Digital TV, Digital Satellite as well as DVD, LD software in digital surround, which is the next step above Dolby Pro Logic. In Comparison with Dolby Pro Logic, Dolby Digital can provide separate left surround and right surround channels, for more precise localization of sound and a more convincing, realistic ambience.

And, with Dolby Digital all five main channels can be full ranged and a subwoofer can be added to each channel, if desired.

By providing up to 5.1 channels of digital audio independently. Dolby Digital lets you enjoy better sound quality and more powerful presence than conventional Dolby Surround.

Pro Logic II, the next generation in Dolby Surround Pro Logic technology, brings the excitement of surround sound to any existing stereo mix, while making existing Dolby Surround mixes sound more like discrete 5.1-channel surround sound. It works with CDs, VHS tapes and TV shows, and MP3 files and radio broadcasts-converting all of these source to surround sound, without the artifacts by other matrix-decoding technologies.

Circle Surround is backward compatible, such that surround playback is possible from any stereo or passive matrix-encoded material.

Five full-bandwidth, discrete channels of information can be extracted from an enormous library of material not multi-channel encoded. These sources include many of today's DVDs and laser discs, as well as most all video tape, VCD, Compact Disc, radio and television broadcast material.

"Dolby", "Pro Logic", and the double-D symbol are trademarks of Dolby Laboratories.

"DTS", "ES" and "DTS Digital Surround" are trademarks of Digital Theater Systems, Inc.

Circle Surround and the  symbol are trademarks of SRS Labs, Inc. Circle Surround technology is incorporated under license from SRS Labs, Inc.

FEATURES

- Dolby Digital and DTS surround sound decoding, plus Dolby Pro LogicII decoding, Circle Surround and a variety of additional surround modes.
- 6.1 mode reproduces the original 6.1 channel soundfield by extracting the surround back signal from surround left and surround right channels.
- 96 kHz/ 24 bit decoding for highest possible fidelity and bandwidth, and high-resolution playback of 96 kHz/ 24 bit PCM audio sources.
- 110 watts to each of the six main channels; the power amp section features advanced, premium high-storage power supply capacitors, and fully discrete output stages housed in cast aluminum heat sinks.
- 6.1 channel pre-amp outputs for connection to external components such as a subwoofer and external power amplifiers.
- Seven-channel direct inputs accommodate future surround sound formats or an external digital decoder.
- 4 Digital inputs, for connection to other sources, such as DVD, DSS, CD, CD-R or MD.
- 2 Digital outputs for connection to CD-R or MD.
- High-quality AM /FM tuner with 30 station presets.
- Source Direct switch bypasses, tone controls and bass management for purest audio quality.
- S-video and composite video switching .
- On- Screen- Display with both Composite and "S" video.
- Front panel A/V inputs, with S-video .
- Easy to use, on-screen menu.
- Supplied with RC6200SR Programmable Learning Remote Control.

FRONT PANEL FEATURES (SEE PAGE iii.)

① POWER switch and STANDBY indicator

When this switch is pressed once, the unit turns ON and display appears on the display panel. When pressed again, the unit turns OFF and the STANDBY indicator lights.

When this unit is in the standby mode, pressing one of the **FUNCTION SELECTOR** buttons also allows to turn the power on.

"When the STANDBY indicator lights up, the apparatus is NOT disconnected from the AC supply mains."

② PHONES jack for stereo headphones

Conventional dynamic headphones can be plugged in here.

Notes:

When using headphones, the surround mode is switched automatically to STEREO and the sound from the speakers is muted.

The surround mode returns to the previous setting as soon as the plug is removed from the jack.

③ SURROUND MODE Selector knob

When this knob is turned, the surround mode is switched in the following sequence.

Note:

Not all modes will be present if an analog input is selected.

④ VOLUME control knob

Adjusts the overall sound level. Turning the control clockwise increases the sound level.

⑤ FUNCTION SELECTOR buttons (AUDIO/VIDEO)

These buttons are used to select the sources.

The video function selector, such as TV, DVD, VCR1 and DSS/VCR2, and AUX, selects video and audio simultaneously.

Audio function sources such as CD, TAPE, CDR/MD, and TUNER may be selected in conjunction with a Video source.

This feature (Sound Injection) combines a sound from one source with a picture from another.

Choose the video source first, and then choose a different audio source to activate this function.

⑥ 7CH INPUT button

Press this button to select the output of an external multi channel decoder.

⑦ A/D (Analog/Digital) SELECTOR button

This is used to select between the analog and digital inputs.

Note:

This button is not used for an input source that is not connected to a digital input.

⑧ S. (Source) DIRECT button

When this button is pressed, the tone control circuit is bypassed as well as Bass Management.

Notes:

The surround mode is automatically switched to AUTO when the source direct function is turned on.

Additionally, Speaker Configurations are fixed automatically as follow.

Front SPKR = Large

Center SPKR = Large

Surround SPKR = Large

Surround Center SPKR = Yes

Sub woofer = Yes

⑨ SLEEP button

Set the sleep timer function with this button .

⑩ DIMMER button

When this button is pressed once, the display is dimmed.

When this button is pressed twice, the display is turned off and "DISPLAY OFF" indicator lights up.

Press this button again to turn the display ON again.

⑪ MUTE button

Press this button to mute the output to the speakers. Press it again to return to the previous volume level.

⑫ CLEAR button

Press this button to cancel the station memory setting mode or preset scan tuning.

⑬ MEMORY button

Press this button to enter the tuner preset memory numbers and station names.

⑭ TUNING / PRESET UP and DOWN buttons

During reception of AM or FM, you can scan the other frequencies or select another preset station pressing these buttons.

⑮ FREQUENCY / PRESET button

During reception of AM or FM, you can change the function of the UP/DOWN buttons for scanning frequencies or selecting preset stations by pressing this button.

⑯ FM MODE button

Press this button to select the auto stereo mode or mono mode when the FM band is selected. The AUTO indicator lights in the auto stereo mode.

⑰ INFRARED SENSOR window

This window receives infrared signals from the remote control unit.

⑱ AUX input jacks

These auxiliary video/audio input jacks accept the connection of a camcorder, portable VCR, etc.

REAR PANEL CONNECTIONS (SEE PAGE iii.)

All connections to the rear panel should be made with the entire system powered off.

To avoid errors, it is advisable to connect one cable at a time between the various components.

(1) FM antenna terminal (75 ohms)

Connect an external FM antenna with a coaxial cable, or a cable network FM source.

AM antenna and ground terminals

Connect the supplied AM loop antenna. Use the terminals marked "AM" and "GND".

The supplied AM loop antenna will provide good AM reception in most areas.

Position the loop antenna until you hear the best reception.

(2) PRE OUT jacks

Jacks for Front - L/R, Center, Surround and Surround center.

Use these jacks for connection to an external power amplifier.

(3) SUB WOOFER output jack

Connect to the input jack(s) of the power amplifier for subwoofer channel or powered subwoofer.

(4) Analog audio outputs for audio source equipment

TAPE and CD-R/MD

Connect each output to the audio inputs (REC in) of your recording equipment.

(5) Analog audio inputs

CD, TAPE, and CD-R/MD

Connect the audio outputs of your source components to the input jacks on the receiver.

(6) Video outputs

VCR1, and DSS/VCR2

Connect each output to the video input (REC in) of your video recording equipment.

(7) TV MONI. (VIDEO/S-VIDEO) output jacks

Connect the TV MONI jack to your TV's video input (VIDEO IN) jack. You can connect your video equipment with S-VIDEO jacks if possible, or the composite VIDEO jacks.

You must use the same type of connection from your video player into the receiver, and out of the receiver into your TV.

Both must be composite video or both must be S-Video. You cannot convert a signal from one type to the other.

When you connect to S-video connections, there will be no signal output from the composite video jacks.

(8) SPEAKER SYSTEMS terminals

FRONT Left & Right speakers output terminals

Connect to the front left & right speakers.

CENTER speaker output terminals

Connect to the center speaker.

SURROUND Left & Right speakers output terminals

Connect to the surround (rear) left & right speakers.

SURROUND Center speakers output terminals

Connect to the surround center speakers.

(9) 7 CH INPUT jacks

Connect to the outputs of an external multichannel decoder.

(10) DIGITAL outputs

Optical and Coaxial

Connect digital input of your digital recording equipment.

(11) DIGITAL inputs

Fig.1,2 (Optical) and Fig. 3, 4 (Coaxial)

Connect each input to the digital output of your source equipment. Use the system setup menu to assign digital input to appropriate source. (see page. 12)

Note :

The coaxial connections are not for AC-3 RF from the LD player, If you want to decode this type of signal, an external demodulator must be used.

(12) REMOTE CONT. IN/OUT terminals

Connect to a Marantz component equipped with remote control (RC-5) terminals.

(13) Analog audio outputs for video source equipment

VCR1, and DSS/VCR2

Connect each output to the audio inputs (REC in) of your video recording equipment.

(14) Analog audio inputs for video source equipment

TV, DVD, VCR1, and DSS/VCR2

Connect each input to the audio outputs of your video source equipment.

(15) Video inputs

Ex: TV, DVD, VCR1, and DSS/VCR2

Connect each input to the video outputs of your video source equipment.

(16) S-video inputs

Ex: TV, DVD, VCR1, and DSS/VCR2

Connect each input to the S-video outputs of your video source equipment.

(17) AC OUTLET

Connect the power cables of components such as a DVD and CD player to these outlets. Both SWITCHED and UNSWITCHED outlets are provided.

The one marked SWITCHED provides power only when the SR6200 is turned on and is useful for components which you use every time you play your system.

The one marked UNSWITCHED is always live as long as the SR6200 is plugged into a live outlet.

A component connected here may be left on permanently, or may be switched off with its own power switch.

Caution:

In order to avoid potential turn-off thumps, anything plugged in here should be powered up BEFORE the SR6200 is turned on.

(18) Power cable

Connect to AC power outlet.

SR6200 can be powered by 120V AC only.

REMOTE CONTROL BUS CONNECTIONS

This unit is equipped with a remote control function.

By connecting this unit's remote control jacks to a Marantz CD player or tape deck equipped with remote control (RC-5) jacks, it allows system remote control to operate.

Connect **REMOTE CONTROL OUT** jack of SR6200 to REMOTE CONT. IN of other Marantz equipment, i.e. CD player or tape deck, by using an RCA pin cable.

Note:

If a component equipped with remote control (RC-5) jacks has an INT/EXT switch on the rear panel, set the switch to EXT when using the system control function.

(Connection example)

SR6200 rear panel CD player rear panel Tape deck rear panel

CONNECTION FOR A SUBWOOFER

Use this connection when using a sub-woofer speaker.
You can also connect a powered subwoofer.

Controlling the power ON/OFF of a power amplifier connected to the SR6200 through Marantz remote control

1. Now the MA6100 can be turned ON / OFF in synchronism with the power ON / OFF of the SR6200.

Notes:

- Be sure to connect the remote control bus before the procedure above.

REMOTE CONTROL OPERATION

- The remote control unit (RC6200SR) provided with the SR6200 is a "learning"-type, programmable unit capable of controlling almost any component in your system, as well as the Marantz D-BUS components (RC-5). The components to be controlled can be selected with one slide switch [2] and nine buttons [26], except AUX button.

RC-5/USER/LEARN SWITCH (MODE SELECT SWITCH)

In the RC-5 position, all buttons output RC-5 codes only. In the USER position, the previously-learned remote control codes can be output, but RC-5 codes are output with buttons which have not learned any function. The LEARN position is used when programming codes under the buttons.

OPERATION

The provided remote control unit is a system remote controller. The **POWER** button [1], 10-key numeric buttons [5] and control buttons [8] are used in common across different input source components.

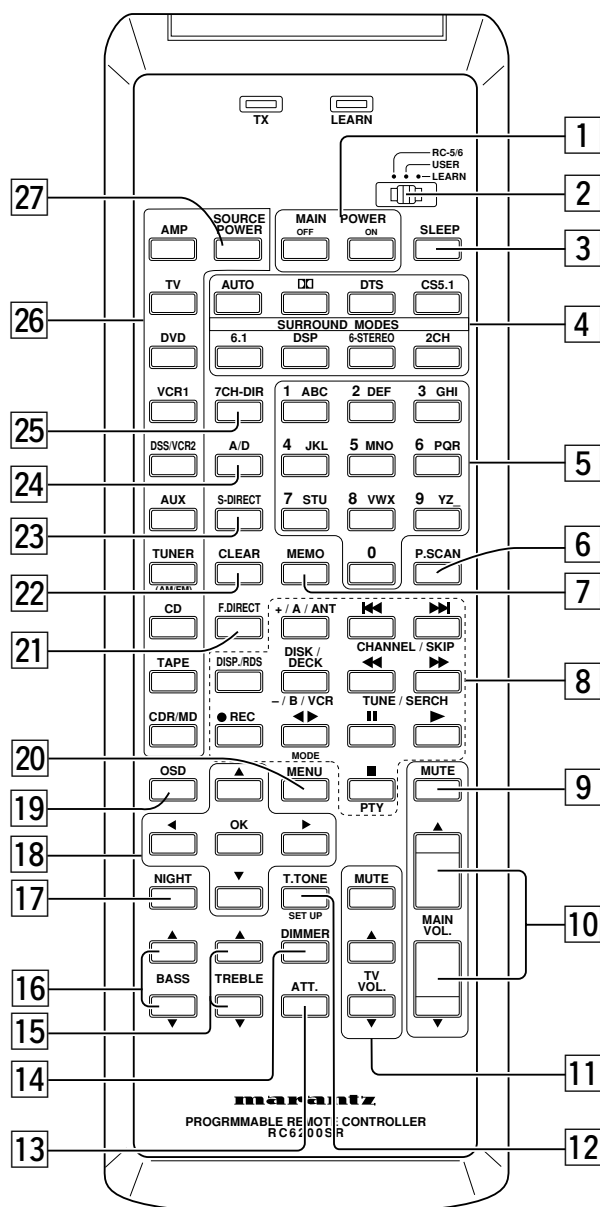

The input source system controlled with the remote control unit changes when one of the input selector buttons [26] is pressed.

- Example: To select the DVD player as the input source and play an DVD on it

Press the DVD button [26] twice within 2 seconds.

The input function of the SR6200 is switched to DVD and the remote control unit is set for control of the DVD player. Press the PLAY ► button [8] to play the DVD.

FUNCTION AND OPERATION

1 MAIN POWER buttons

Press to switch the power of the SR6200 ON or OFF.

2 Mode select switch

Set this switch to set the remote control mode to the **RC-5** mode, **USER** mode or **LEARN** mode.

3 SLEEP (sleep timer) button

This button is used for setting the sleep timer.

4 SURROUND MODE buttons

Use these buttons to select a surround mode.

5 Numeric buttons 0,1 to 9 (A, B, C ... Z, -)

These buttons are used to enter figures in the selection of a tuner preset station and station name preset or to select a CD track number, etc. The functions of these buttons are dependent on the function button selected.

6 P.SCAN (preset scan)

This button is used to start preset scan when SR6200 is selected TUNER mode.

7 MEMO button

Memory enable button for various preset functions.

8 CONTROL buttons

These buttons are used when operating the CD player, TAPE deck, etc. The functions of these buttons are dependent on the function button selected.

For the controllable functions of each input function, please refer to Chart 1.

Chart 1

9 MUTE button

Muting button of the SR6200. Press this button to temporarily decrease the volume. Press again to return to the previous volume.

10 MAIN VOLUME UP (▲) /DOWN (▼) buttons

Main volume control of the SR6200. These buttons increase or decrease the front, surround center and subwoofer channel volumes simultaneously.

11 TV operation buttons

These buttons are used exclusively to control the TV set.

MUTE button

Muting of TV sound.

TV VOLUME UP (▲)/DOWN (▼) buttons

Volume UP/DOWN of TV.

12 TEST (test tone) button

Test tone function is used for adjusting the balance between the volume levels of speaker channels. Press **AMP** button and press this button to enter the test tone mode.

13 ATT (attenuater) button

ATT (Attenuater) button attenuates the AUDIO/VISUAL signal selected with the FUNCTION buttons (AUDIO, AUDIO/VIDEO). When the input signal is too great and the voice distorts even by throttling the SR6200 VOLUME control, turn on the function. "ATT" is displayed when this function is activated

The signal input level is reduced by about the half. The attenuater is invalid for use with the output signal of "REC OUT"(TAPE OUT/VCR OUT).

14 DIMMER button

When this button is pressed once, the display is dimmed.

When this button is pressed twice, the display is turned off and the "DISPLAY OFF" indicator lights up.

Press this button again to turn on the display again.

15 TREBLE buttons

These buttons are used to adjust the tone control of high frequency sound for left, center and right speaker.

16 BASS buttons

These buttons are used to adjust the tone control of low frequency sound for left, center right and subwoofer speaker.

17 NIGHT button

Pressing this button prevents the Dolby Digital signal from playback at a loud voice. This function reduces the voice by 1/3 to 1/4 at maximum. Thus, it eliminates the occurrence of an abruptly loud voice at night. However, the function is valid only in the case when the Dolby Digital signal is entered into OPTICAL or COAXIAL and data to compress the voice exists in the signal to be played back.

18 Cursor buttons (◀, ▶, ▲, ▼, OK)

Use these button when operating the on-screen menu functions.

See page 11.

19 OSD (on-screen display) button

Press this button to display the current setting status of the SR6200 on the TV screen.

Once the button is pressed, the on-screen display is turned on and each time a control button related to the SR6200 is pressed thereafter, the information will be displayed on the TV screen.

When the button is pressed again to turn the on-screen display off, it disappears from the TV screen.

(Refer to "On-screen display" on page 11.)

20 MENU button

This button is used to enter the OSD main menu.

21 F.DIRECT button

This button is used to inputs a frequency directly

22 CLEAR button

This button is used to cancel for certain memory or programming operations.

23 S- (Source) DIRECT button

When this button is pressed, the tone control circuit is bypassed as well as Bass Management.

24 A/D button

This button is used to switch between the analog and digital inputs.

25 7CH-DIR button

This button is used to activates 7-channel input

26 Input system selector buttons/ FUNCTION SELECTOR buttons (AUDIO/ VIDEO INPUT)

Press one of these buttons once or twice to select a particular source component. For example, to set the amplifier or receiver to the DVD input, press the DVD button 26 twice within 2 seconds.

Note:

CDR/MD button is set CDR function at initial. To switch MD function, press and hold down **CDR/MD** button and press **2** button 5.

To return CDR function, press and hold down **CDR/MD** button and press **1** button 5.

27 SOURCE POWER button

Press to switch the power of an individual source component ON or OFF.

For example, to turn on the DVD player, first press the **DVD** button 26 then press the **SOURCE POWER** button 27.

Note:

All of the MARANTZ components equipped with D-BUS (RC-5) connection use the same power ON and OFF commands.

As a result, simply pressing the source power button of the remote control unit also allows you to turn the power of the components ON and OFF.

LEARNING METHOD

This remote control unit (RC6200SR) can learn, or program in itself, the remote control code of any function preset under any button of the remote control unit of any system component, except for the **MAIN POWER** and the **FUNCTION** buttons of the RC6200SR. The functions of the components that can be controlled through the D-BUS (RC-5) need not be learned, but the functions of other components must be learned before they can be controlled from the RC6200SR remote control unit. To let the RC6200SR learn the remote control code of a function of a component, follow the learning procedure described below.

1. Set the mode switch 2 to **LEARN**.
2. Select the component with the codes to be learned, by pressing one of the input selector buttons.
For example, when the CD button is pressed, most of the buttons on the remote control unit get ready to learn the CD control codes.
3. On the RC6200SR, press the button corresponding to the function to be learned. For example, if the function to be learned is playback, press the **PLAY** (▶) button on the remote control unit. The **LEARN** indicator will light up.
4. Place the remote control unit of the component with the function to be learned at a distance of about 20 cm (8 inches) from the RC6200SR, so that the head (transmitting side) of the former remote control unit points the head of the RC6200SR.
5. On the remote control unit of the component, press and hold the button of the function to be learned, until the learning indicator of the RC6200SR starts to blink then goes off. The learning operation is complete when the indicator is extinguished.
6. Set the mode switch to **USER**.
7. Let the RC6200SR learn other codes by repeating the steps above for each code.

Note:

When the system mode switch is in the **USER** position, the buttons which have not learned any function output the D-BUS (RC-5) codes when they are pressed. In the **RC-5** (D-BUS) position, all buttons output the D-BUS (RC-5) codes.

FUNCTIONS THAT CAN BE LEARNED

The RC6200SR has buttons that can **LEARN** to 1, 4 or 10 types of different codes.

See the chart on the next page for the types of codes that can be learned by each button.

RECALLING THE PRESET FUNCTION

Even after a button has learned the remote control code of a function, its originally preset, D-BUS (RC-5) code can be recalled any time by following the procedure below.

1. Set the mode switch to **LEARN**.
2. Press the **MAIN POWER OFF** button and the button which has learned a function simultaneously.
3. Set the mode switch to **USER**.

Learning button indications

Although the learning buttons can be used to operate various components, the indications printed above the buttons are Marantz D-BUS (RC-5) preset code indications. To make it easier to remember which buttons perform which operations, therefore, we recommend that you program operations into buttons having the same or similar indications.

There are some situations where programming is not possible.

In the following instances, both the TX and LEARN LEDs blink to indicate that programming cannot be carried out.

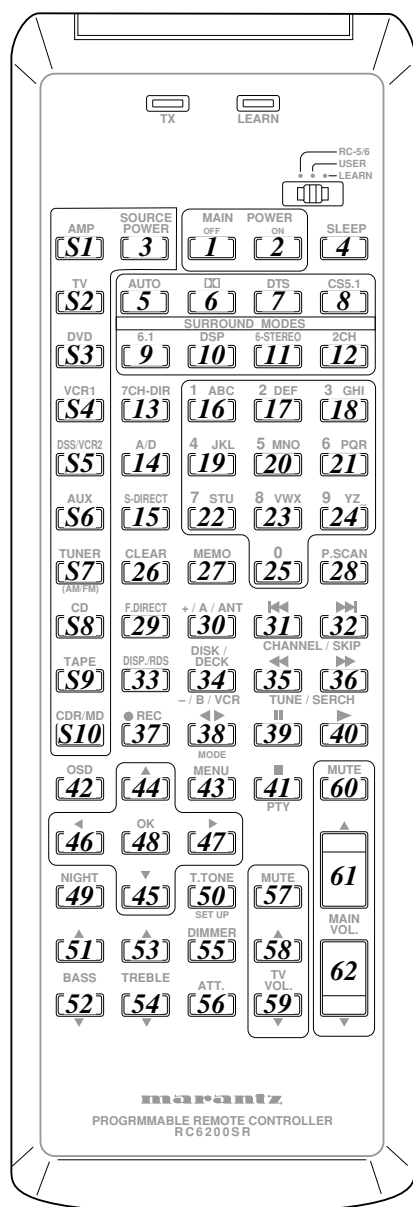

1. When the remote control unit's memory is full.
2. When you attempt to program a command from a remote control unit using a different signal transmission format.

CLEARING ALL OF THE LEARNED CODES

Use the following procedure to reset all of the buttons which have learned remote control codes and make them possible to output RC-5 preset codes.

1. Set the mode switch to **LEARN**.
2. Hold down the **MAIN POWER ON** and **OFF** buttons simultaneously for more than 3 seconds. The TX and LEARN LED will blink and goes off.
3. Set the mode switch to **USER**.

LEARNABLE NUMBER OF BUTTONS

	SYSTEM KEY NO. SYSTEM NAME	S1 AMP	S2 TV	S3 DVD	S4 VCR1	S5 DSS/VCR2	S6 AUX	S7 TUNER	S8 CD	S9 TAPE	S10 CDR/MD	TOTAL

OPERATION OF REMOTE CONTROL UNIT

1. Remote control

The distance between the transmitter of the remote control unit and the IR SENSOR of the SR6200 should be less than about 5 meters. If the transmitter is pointed to a direction other than the IR SENSOR or if there is an obstacle between them, remote control may not be possible.

Remote-controllable range

2. Loading batteries

The life of the batteries used with the remote control unit is about 4 months with normal use. Also be sure to replace batteries earlier when you notice that they are getting weak.

(1) Remove the back cover.

(2) Insert the new batteries (AAA type) with correct (+) and (-) polarity.

(3) Close until it clicks.

SET-UP

After all components are connected, initial setup must be performed.

ON SCREEN DISPLAY (OSD) MENU SYSTEM

The SR6200 incorporates an on-screen menu system, which makes various operations possible by using the cursor (◀, ▶, ▲, ▼) and **OK** buttons on the remote controller.

The settings made with these buttons are also shown in the on-screen display.

OSD MAIN MENU

SURROUND MODE

SYSTEM SETUP 1/2

SPEAKER SETUP 1/3 SPKR SIZE

CHANNEL LEVEL CONTROL

SYSTEM SETUP 2/2

SPEAKER SETUP 2/3 SPKR DISTANCE

SPEAKER SETUP 3/3 SPKR LEVEL

OSD MAIN MENU

1. Press the **AMP** button [26].
2. Press the **MENU** button [20] to display the "MAIN MENU" of the on-screen display menu.
Choose a desired item in the contents with ▲ or ▼ button, and press the **OK** button to select.
Display will change to menu for each item.

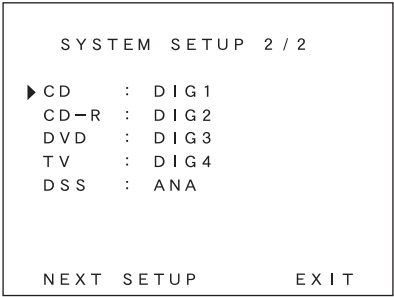

SYSTEM SETUP

SYSTEM SETUP 1/2

- 7CH-INPUT** : The 7 channel input of the SR6200 can be selected to use a 7channel input. Select 7 channel use by ◀ or ▶ button.
- TV AUTO** : This product is equipped with a TV-auto ON/OFF system, which automatically turns on or off the power 1 second to 5 minutes after the TV video input signal has been sent or has been stopped.
Switch the TV AUTO ON/OFF function to enable or disable with ◀ or ▶ button.
To use this function, connect the TV video input to TV tuner's video output.
- NEXT SETUP/EXIT** :If you desire to continue the next setup ,press the **OK** button on NEXT-SETUP, if you desire to exit from OSD menu system, press the **OK** button on EXIT.

SYSTEM SETUP 2/2 (SELECTING THE DIGITAL INPUT)

Four digital inputs can be assigned for the desired source.
Use this menu to determine which source is connected to which input.

- Example;**
When the digital output of a DVD player is connected to Digital 4 (input jack) of the SR6200;
1. Move the cursor on the line of the DVD with cursor buttons ▲ or ▼.
 2. Press the cursor ◀ or ▶ button until "DIG4" is displayed.
 3. Press the **OK** button to chose.
 4. If you desire to continue the next setup, press the **OK** button on NEXT-SETUP.
If you desire to exit from OSD menu system, press the **OK** button on EXIT.

Notes:
The TUNER, TAPE, VCR1 and AUX are assigned to the analog input, and are prevented from selecting any digital input.
While the DTS-LD or DTS-CD is playing, this setup is not available, this is to avoid noise being generated from the analog input. Stop the LD or CD playback to setup.
The SR6200 does not switch from digital input to analog input or vice versa automatically.
In the event that both digital and analog inputs are connected to SR6200, if you desire to switch to an analog input temporarily, you can switch by pressing the **A/D** button [7].

SPEAKERS SETUP

The home theater system you already have installed should function provided that there are left, center and right front speakers, left and right rear/surround speakers and a subwoofer. For best results we recommend that all front speakers be of the same type, with identical or similar driver units. This will deliver smooth pans across the front sound stage as the action moves from side to side.

Your center channel speaker is very important as over 80 % of the dialog from a typical motion picture emanates from the center channel. It should possess similar sonic characteristics to the main speakers.

Surround channel speakers need not be identical to the front channel speakers, but they should be of high quality.

The surround center speaker is useful for playback of Dolby Digital Surround EX or DTS-ES. One of the benefits of both Dolby Digital (AC-3) and DTS is that surround channels are discrete full range, while they were frequency limited in earlier "Pro Logic" type systems. Bass effects are an important part of home theater. For optimal enjoyment a subwoofer should be used as it is optimized for low frequency reproduction. If you have full range front speakers, however, they may be used in place of a subwoofer with proper setting of the switches in the menu system.

If possible, mount the surround speakers on the walls to the sides of the viewing area, 2-3 feet above seated viewers, firing straight across at each other.

SPKR SETUP 1/3 (SPKR SIZE)

```

  SETUP1/3  SPKR SIZE
  ▶ SETUP : UNLOCKED

  FRONT-L/R : LARGE
  CENTER    : SMALL
  SURR-L/R  : SMALL
  SURR. CENTER : YES
  SUBWOOFER : YES

  NEXT SETUP  EXIT
  
```

SETUP: Select "LOCKED" with ◀ or ▶ button in order to lock the contents of the SPCR SET UP MENU.

When you want to change the contents of this setup, select "UNLOCKED".

SPKR SIZE

This menu enters the information about which type of speakers will be used for each channel.

In turn, these settings will determine which speakers receive low frequency information.

For the purpose of establishing proper bass reproduction, use the LARGE settings if the speaker being used at any position is a traditional full-range loudspeaker that is capable of reproducing sound below 100 Hz and you are not using a subwoofer.

Use the SMALL setting for smaller, frequency-limited speakers that are not able to reproduce sounds below 100Hz and you are using a subwoofer. Low frequencies will be diverted from the speaker to the subwoofer.

Note that when "small" speakers are used it is advisable to install a separate subwoofer, especially if you wish to appreciate the full impact of a good home theater soundtrack.

If the Surround speakers or Center speaker will not be used, set NONE for each speaker. The NONE setting will send the audio for the channel to other speakers.

FRONT -L/R : Select the type of front speakers with ◀ or ▶ button.

CENTER : Select the type of center speaker with ◀ or ▶ button.

SURR-L/R : Select the type of surround speakers with ◀ or ▶ button.

SURR.CENTER : Select the surround center speaker YES or NO with ◀ or ▶ button.

SUBWOOFER: Select the subwoofer speaker YES or NO with ◀ or ▶ button.

Notes:

The SUBWOOFER cannot be set to NO when the front speakers are set to SMALL.

This speaker size setup is not effective when the SOURCE-DIRECT or 7CH. Input is selected.

SPKR SETUP 2/3 (SPKR DISTANCE)

```

  SETUP2/3  SPKR DISTANCE
  ▶ UNIT    : f t
  FRONT-L   : 10 f t
  FRONT-R   : 10 f t
  CENTER    : 10 f t
  SURROUND-L : 10 f t
  SURROUND-R : 10 f t
              ENTER

  NEXT SETUP  EXIT
  
```

Use this parameter to specify the distance of the speaker's position from the listener.

The delay time is automatically set according to these distances.

UNITS: You can select Meters or Feet.

If you select "ft", the setting parameter will change in 1 foot steps.

If you select "m", it will change in 0.3 meter steps.

Select speaker with ▲ or ▼ button, and input each speaker's distance with ◀ or ▶ button.

When the input for each speaker's distance has been finished, move the cursor to ENTER and press the OK button.

NOTES :

If your selection(s) are out of range, the distance cannot be stored. Placement beyond that distance is beyond the range of the automatic time delay feature.

The delay feature does not function in the SOURCE-DIRECT ,7 CH-Input modes and decoding of 96 kHz sources.

SPKR SETUP 3/3 (SPKR LEVEL)

```

  SETUP3/3  SPKR LEVEL
  ▶ TEST MODE : MANUAL
  TEST TONE  : OFF
  FRONT-L    : 00 d B

  [Speaker Level Indicators]

  RETURN      EXIT
  
```

SPKR LEVEL

TEST MODE: Selects the mode for generating the test tone.

If you select AUTO, the test tone will be cycled through in a circular pattern which is Left → Center → Right → Surround Right → Surround Center → Surround Left → Subwoofer → Left → ... 3 seconds for each channel.

If you select MANUAL, press the OK button to select the test tone channels after the "TEST TONE ON".

TEST TONE: Press the ◀ or ▶ button, ON is indicated and the test tone starts from the front L-CH speaker.

Press the ◀ or ▶ button again on this item. OFF is indicated and the output of the test tone will stop.

Channel: Adjust the level of test tone for each channel with the ◀ or ▶ buttons of the RC6200SR. The current volume level is shown at the center of the display.

SURROUND MODE

SURROUND MODE		
▶ SOURCE DIRECT	:	OFF
SURR-MODE	:	AUTO
NIGHT MODE	:	OFF
LFE LEVEL	:	00 dB
RETRUN EXIT		

SOURCE DIRECT : Switch the source direct ON or OFF with ◀ or ▶ button. This bypasses the surround processing and crossover for the main speakers (front left and right will be full range and the subwoofer will be ON)

Note: Surround mode cannot be changed in Source Direct mode.

SURR-MODE : Select the surround mode with ◀ or ▶ button.

NIGHT MODE : Switch the NIGHT MODE ON or OFF with ◀ or ▶ button.

Selecting the Night Mode ON is effective in Dolby Digital only, and it compresses the dynamic range.

This softens loud passages such as sudden explosions, to help prevent disturbing others late at night.

LFE LEVEL : Select the output level of the LFE signal included in the Dolby Digital signal or the DTS signal. Select 0dB, -10 dB or OFF with ◀ or ▶ button. The level is ordinarily set to 0 dB. When use DTS music source, LFE level is set to -10 dB.

CHANNEL LEVEL CONTROL

CH. LEVEL CONTROL		
▶ FRONT L		00 dB
FRONT R	:	00 dB
SUBWOOFER	:	00 dB
CENTER	:	00 dB
SURROUND L	:	00 dB
SURROUND R	:	00 dB
SURR. CENTR	:	00 dB
RETRUN EXIT		

Desired channels can be selected by pressing ▲ or ▼ button.

Each channel level will be adjusted by pressing ◀ or ▶ button.

Only the usable channels which are determined depending on the SURROUND mode, and SPEAKER SETTING are displayed.

BASIC OPERATION

LISTENING TO THE TUNER

MANUAL TUNING

1. To select the tuner as the source, press the **TUNER** button [5] on the front panel or press the **TUNER** button [26] on the remote.
2. Press the **TUNER** button [5] on the front panel or press the **TUNER** button [26] on the remote to select the desired frequency band if required.
3. Press the **F/P** button [15] on the front panel to display the frequency.
4. Press the **TUNING/PRESET** ▲ or ▼ button [14] on the front panel or press the ◀◀ or ▶▶ button [8] on the remote.
5. If FM is selected, press the **MODE** button [16] on the front panel or press the **MODE** button [8] on the remote control to select the desired audio mode.

(FM) MODE BUTTON OPERATION

When "AUTO" indicator is on in the display, FM stations that broadcast in stereo will be received in stereo and the "STEREO" indicator lights.

When "AUTO" indicator is off, all the FM stations will be received in mono regardless of whether or not they are broadcasting in stereo.

AUTO TUNING (USING THE SR6200)

1. Press the **F/P** button [15] on the front panel to display the frequency.
2. Press the **TUNING/PRESET** ▲ or ▼ button [14] on the front panel for more than 1 second to start the Auto tuning function.

AUTO TUNING (USING THE REMOTE CONTROL UNIT)

Press ◀◀ or ▶▶ button [8] for more than 1 second to start the Auto tuning function.

PRESET TUNING

With this unit you can preset up to 30 FM/AM stations in any order. For each station, you can memorize the frequency and reception mode if desired.

1-a. Manual Presetting (Using the SR6200)

1. Refer to the "MANUAL TUNING" or "AUTO TUNING" section above to tune in a desired station.
2. Press the **MEMORY** button [13]. "MEMORY" indicator starts blinking on the display.
While "MEMORY" is still blinking (approx. 5 seconds), select the preset number by pressing the **TUNING/PRESET** ▲ or ▼ button [14] then press the **MEMORY** button [13] again.
3. When a number has been properly input, "MEMORY" indicator stops blinking and goes out.
The station is now stored in the specified preset memory location.

1-b. Manual Presetting (Using the remote control unit)

1. Tune in a desired station.
2. Press the **MEMO** button [7].
3. Enter the desired preset number with ten keypad [5].
4. Then, press **MEMO** button [7] again to store.

2. Auto Presetting

This function automatically scans the FM and AM band and enters all stations with sufficient signal strength into the memory.

1. Press and hold down the **MEMORY** button [13] and **TUNER** button [5] simultaneously, auto presetting will start.
2. "MEMORY" will blink on the display.
3. Each time the tuner finds a station, the scanning will pause and memory. Auto presetting will starts.
4. Operation stops automatically when all 30 preset memory positions are filled or when auto scanning attains the highest end of all bands.
To stop the auto preset function at anytime, press the **CLEAR** button [12].

3. Recalling a Preset Station

1. Press the **F/P** button [15] to change the display to preset.
2. Select the desired preset station by pressing **TUNING/PRESET** ▲ or ▼ button [14] on the front panel or press **CHANNEL** button [8] on the remote.

Note:

To directly access the preset stations using the numeric keypad, select the desired preset station by entering one or two digits using the numeric keypad [5].

To return to the Manual Tuning mode, press the **F/P** button [15].

4. Preset Scan Tuning (Using the remote control unit)

1. Press the **P.SCAN** button [6] on the remote control. (The preset station with the smallest preset number is recalled first. If no stations have been preset, "NO PRESET" shows in the display and the unit returns to the previous mode.)
2. Preset stations are recalled in sequence (CH-1 → CH-2, etc.) for 5 seconds each. Preset numbers that do not contain stations are skipped.
3. You can fast forward the preset stations by pressing the **CHANNEL** ▶▶ button [8] continuously.
When the desired preset station is received, cancel the preset scan operation by pressing the **CHANNEL** ◀◀ button [8] or the **CLEAR** button [22].

5. Clearing Preset Stations

You can remove preset stations from memory using the following procedure.

1. Recall the preset number to be cleared with the method described in "Recalling" a preset station.
2. Press the **CLEAR** button [12] on the front panel or **CLEAR** button [22] on the remote control unit for 3 seconds or more.
"CLEAR" appears on the display to indicate that the specified preset number has been cleared.

6. Frequency Direct Call

1. Press **F.DIRECT** button [21] in the TUNER mode on the remote controller.
2. Display shows "FM- -- -- -MHz" (at FM mode).
3. Input your desired frequency with tenkeypad buttons on the remote controller.
Eg) 98.1 MHz
Press 9, 8, 1 and 0
4. Press the **F.DIRECT** button [21] again.

STATION NAME PRESET (On PRESET display mode)

The station name preset function allows the name of each preset channel to be entered using alphanumeric characters. The Station Name button is valid only in the tuner mode. Before station name preset operation, store stations with the preset memory operation.

1. Press the **MEMORY** button ⑬ on the front panel or **MEMO** button ⑦ on the remote for more than 3 seconds.
2. The left most column of the station name indicator flashes, indicating the character entry ready status.

[Operation (Using the SR6200)]

3. When you press the **TUNING/PRESET** ▲ or ▼ buttons ⑭ is turned, alphabetic and numeric characters will be displayed in the following order:

A → B → C ... Z → 1 → 2 → 3 ... 0 → - → + → / → (Blank) → A
 UP →
 ← DOWN

4. After selecting the first character to be entered, press the **MEMORY** button ⑬. The entry in this column is fixed and the next column starts to flash. Fill the next column and press the **MEMORY** button ⑬ for more than 1 second to confirm the entry.

[Operation (Using the remote control unit)]

First, press the **TUNER** button ⑫ on the remote control unit.

(This operation is not necessary if the remote control unit has already been operated in the TUNER mode.)

3. Enter the character using the ten keypad ⑤. For example, to enter "A":
 - 1) Press the "1" button. "A" appears on the display column.
 - 2) Every time the 1 button is pressed, the displayed character changes in the order: A → B → C → 1 → A...
 Pressing buttons other than the "1" button cause different characters to be displayed in a similar way, so that other alphanumeric characters can be entered. To enter a blank or space, press the "9" button.
4. When the desired character is displayed, press the **MEMO** button ⑦ to confirm the entry in this column and move to the next column. After having filled all of the 8 columns, press the **MEMO** button ⑦, for more than 1 second to confirm the entry.

PLAYBACK OPERATION

NORMAL PLAYBACK

1. Press the **POWER** button ① / ①.
2. Press the **FUNCTION SELECTOR** button ⑤ on the front panel or press the **FUNCTION** button ⑫ on the remote unit to select an input source.
3. Turn the **SURROUND MODE SELECTOR** knob ③ on the front panel or Surround mode buttons ④ in the AMP MODE on the remote unit to select the desired surround mode.
4. Adjust the volume level using the **VOLUME** knob ④ on the front panel or press the **MAIN VOL.** button ⑩ on the remote. If necessary, adjust the tone, press the **TREBLE**▲, **TREBLE**▼ ⑮ and **BASS**▲, **BASS**▼ ⑯ on the remote unit.

Note:

- In case of remote control operation, press one of the function buttons twice within 2 seconds to select the function.
- Tone control is available for following surround modes. AUTO (except 96 kHz), STEREO, DOLBY PRO LOGIC and DTS.

LISTENING TO A DIFFERENT AUDIO SOURCE WHILE WATCHING A VIDEO SOURCE (Using the remote control unit)

1. Select one of the following video sources
TV, DVD, VCR1, DSS/VCR2 or AUX.
2. Next, select one of the following audio sources
FM, AM, CD, TAPE, or CDR/MD.

TV AUTO ON/OFF FUNCTION

This function allows the component connected to the TV IN jack to control the power (ON/OFF) to the SR6200.

AUTO POWER ON

1. Be sure TV auto mode is enable. (Refer page 12 : System Setup 1/2)
2. Connect your TV TUNER (etc) to the TV IN terminal.
Be sure to connect the video input.
3. Turn OFF the power to the TV TUNER and the SR6200 will be in standby mode.
4. Turn ON the TV TUNER and tune in a receivable station.
5. When the station is received, the SR6200 turns ON and TV is selected automatically.

AUTO POWER OFF

1. In the above situation, turn the TV TUNER OFF or select a channel that does not contain any broadcast.
2. The SR6200 switches to STANDBY after approximately 5 minutes.

Note:

AUTO POWER OFF is canceled if the **FUNCTION SELECTOR** button ⑤ is set to a source other than TV. The function reactivates when TV is selected again.

Caution:

Some TV broadcasts may cause the TV AUTO FUNCTION to be turned enable. To set this function to ENABLE/DISABLE, refer to the SETUP MENU.

SETTING THE SLEEP TIMER

Set the sleep timer while the power is turned on.

1. Turn the power ON and press the **SLEEP** button ⑨ / [3].
2. Press the **SLEEP** button ⑨ / [3] the number of times to set the desired sleep time in minutes.

Each press of the **SLEEP** button ⑨ / [3] or changes the display in the following order:

The unit will shut off in the number of minutes indicated.

- * While the sleep timer is activated, the remaining time can be displayed for approximately 2 seconds by pressing the **SLEEP** button ⑨ / [3].
- * To cancel the sleep timer, press the **SLEEP** button ⑨ / [3] and then press the **CLEAR** button ⑫ on the front panel or the **CLEAR** button 22 in the TUNER mode on the remote unit.

ON SCREEN DISPLAY INFORMATION

The on-screen display, which can be activated by the Main unit or remote, appears on the TV screen to show the current setting status of the SR6200.

1. GENERAL INFORMATION

When the **OSD** button 19 is pressed, the current setting are displayed on the TV monitor.

This display disappears automatically in about 5 seconds after the button is pressed.

① VIDEO SOURCE:

Displays the current video source being selected with the function selector **TV, DVD, VCR1, DSS** or **AUX**.

② AUDIO SOURCE:

Displays the current audio source being selected with the function selector **FM, AM, CD, TAPE, CD-R, TV, DVD, VCR1, DSS** or **AUX**.

③ DIGITAL INPUT:

Displays the digital input that you are using **DIG-1, DIG-2, DIG-3** or **DIG-4**.

④ SURROUND MODE:

Displays the current surround mode

AUTO, STEREO, 6CH STEREO, VIRTUAL, MATRIX, STADIUM, HALL, MOVIE, CS5.1, 6.1 CH SURR, PLO LOGIC, PLII MUSIC, PLII MOVIE, DTS

⑤ MASTER VOLUME

Displays the current volume level.

The volume level is higher at the right of the display.

Note:

The On-Screen Display signals can be output from the TV MONI composite video (RCA) output and the TV MONI, S-Video output jacks.

With some video equipment or software, the On-Screen Display characters may be distorted due to noise or tracking adjustment error.

2. FUNCTION SELECT & SURROUND MODE

When a function selector button or surround mode button is pressed
VIDEO: Displays the current video source. When TV, DSS, DVD, VCR1 or AUX is selected with the function selector, both AUDIO and VIDEO shows the same name.

AUDIO: Displays the current analog audio input source.

DIGITAL: Displays the current digital input source.

SURR-MODE: Displays the current Surround mode as follows;

3. MASTER VOLUME CONTROL

Displayed when the MASTER volume is varied or a button of the remote control unit is pressed.

4. MUTE

When the **MUTE** button **11/9** is pressed, "MUTE ON" will be shown on screen.

Pressing **MUTE** button **11/9** again will show "MUTE OFF" on screen, and return to the previous volume level.

5. SLEEP TIMER

When the **SLEEP** button **9/3** is pressed, the setting on or off and the remaining time of the sleep timer function are displayed.

You can change the mode between on, off and the amount of time to elapse before the unit will shut itself off by cycling the **SLEEP** button **9/3**.

6. OSD OFF

When **OSD** button **19** is pressed, OSD system will be bypassed after 3 seconds.

Then there is no indication on the TV display.

Press the **OSD** button **19** again to activate the OSD.

SURROUND MODES

The SR6200 incorporates digital signal processors (DSP) which can reproduce various surround effects you experience in concert halls and movie theaters, etc. These Surround Modes, are provided to reproduce a variety of surround sound effects, according to the content of the source to be played.

Surround mode	FEATURES
1. AUTO	When this mode is selected, the receiver determines whether the digital input signal is Dolby Digital, PCM-audio or DTS. Note: When a Dolby Digital or DTS signal is input, the number of channels for which the corresponding signal is encoded will be played. Inputting a Dolby Digital two channel signal with Dolby surround status automatically subjects that signal to Pro Logic II processing before play. 96 kHz source material can be playback in this mode.
2. STEREO	This mode bypasses all surround processing. Stereo program sources the left and right channels play normaly when PCM-audio or analog stereo is input. With Dolby Digital and DTS sources, the 5.1 multi-channels are converted to two channel stereo. 96 kHz source material can be playback in stereo mode.
3.  MOVIE MUSIC PRO LOGIC	This mode is used with source materials encoded in Dolby Digital and Dolby Surround. Dolby Pro Logic II brings the excitement of surround sound to any stereo mix, while making existing Dolby Surround mixes sound more like discrete 5.1 channels Surround sound. Dolby Pro Logic II has below 3 modes. This mode provides 5.1 channel surround sound from Dolby Surround encoded stereo movie sound tracks. This mode provides 5.1 channel surround sound from conventional stereo sources, analog or digital, such as CD, tape, FM, TV, stereo VCR, etc. This mode emulated original Dolby Pro Logic decoding (3/1 surround) suit for Dolby Surround encoded stereo movie soundtracks. Note: PCM-audio signals can be subjected to Pro Logic processing when the sampling frequency is 32 kHz, 44.1 kHz or 48 kHz. When a signal in another format is input, output will be muted.
4. DTS	This mode is for DTS encoded source materials such as LASER DISC, CD, and DVD. The DTS mode cannot be used when an Analog input has been selected. When the signal in another digital format is input, output will be muted.
5. 6.1CH Surround	This mode reproduces 6.1 channel sound field by extracting the surround center information from surround left and surround right channels. This mode is suited for 6.1 channel encoded material such as Dolby Digital Surround EX and DTS-ES. Note: Dolby Digital 5.1ch and DTS source material can be playback in this mode.
6. MOVIE HALL STADIUM MATRIX	These modes provide surround effect processing from each input source material. They will produce theater, concert hall and stadium like atmospheres. Select as your taste desires. Note: PCM-audio (32 kHz, 44.1 kHz or 48 kHz) and analog source material can playback in this mode.
7. VIRTUAL	This mode create the virtual surround sound with the front right and left speakers. Note: The 96 kHz sampling frequency and DTS source material mute output.
8. CS5.1	This mode is backward compatible, such that surround sound playback is possible from any stereo or passive matrix-encoded material. Five full-bandwidth, discrete channels of information can be extracted from an enormous library of material not encoded in Dolby Digital or DTS. Note: PCM-audio (32 kHz, 44.1 kHz or 48 kHz) and analog source material can play back in this mode.
9. 6CH STEREO	This mode is used to create a wider, deeper and more natural soundstage from two channel source material. This is done by feeding the left channel signal to both left front and left surround speaker and the right channel signal to both right front and right surround speaker. Additionally, the center channel reproduces a mix of the right and left channel. Note: The 96 kHz sampling frequency mutes output.

Caution for DTS signal:

This signal can be played when the connected DVD-player, laser-disc player or CD-player is capable of DTS-digital output. For details, refer to the player's operation manual.

Depending on the player used, DTS play may produce noise. If that happens, set the Surround mode to DTS.

Playing a DTS-CD or DTS laser disc causes the player's analog output terminal to output noise. Before playing DTS sources, be sure to connect the player's digital output to the SR6200's digital input. Be careful when connecting the output of these players to analog audio input.

Note that the SR6200 has the following restrictive functions built in to reduce noise emission as much as possible.

If DTS is selected while in the Surround mode, digital input cannot be switched to analog input. When the analog input function has been selected, Surround mode cannot be switched to DTS.

While signals from DTS-laser disc or CD are playing in another Surround mode, you cannot switch to digital input or from digital input to analog input.

Caution for 96kHz PCM-audio signal:

This signal can be played when a DVD-player or DAT-player connected to the SR6200 is capable of 96 kHz PCM output. For details, refer to the player's operation manual.

The signal can be played when STEREO or AUTO has been selected for the Surround mode.

Some DVD formatted discs featured copy protect. When use such disc, 96 kHz PCM signal is not output from the DVD player. For details, refer to the player's operation manual.

The relation between the selected surround mode and the input signal

The surround mode is selected with the surround mode selector knob of the SR6200 or the remote control unit. However, the sound from the speakers depend upon the relationship between the selected surround mode and the input signal. They are as follows;

Surround Mode	Input Signal	Output					Fluorescent Indicator			
		L/R	SL/SR	C	SC	SW	Input Indicator	Format Status & Surround Mode	Temporary Display Status	Ch. Status
Auto	Dolby Digital (5.1ch)	O	O	O	-	O	DIGITAL	DOLBY, DIGITAL, AUTO	>AUTO>	L,C,R,SL,SR,LFE

L/R : Front speaker
 SL/SR : Surround speaker () : The indicator blinks
 C : Center speaker
 SC : Surround center speaker
 SW : Sub woofer speaker

L : Left
 R : Right
 C : Center
 SL : Surround Left
 SR : Surround Right
 SC : Mono Surround
 LFE : Low Frequency Effect

Note:

- Dolby Digital (2 ch: Lt/Rt): signal with Dolby Surround flag Speakers are full set.
- When DOLBY DIGITAL, DTS, PCM or ANALOG is blinking, the selected surround mode is unavailable for input signal. Select the other appropriate surround mode to playback.
- No sound outputs from the surround speaker, center speaker and subwoofer if the DVD disc has no surround data.

TROUBLE SHOOTING

In case of trouble, check the following before calling for service:

1. Are the connections made properly ?
2. Are you operating the unit properly following user's guide ?
3. Are the power amplifiers and speaker working properly ?

If the unit does not operate properly, check items shown in the following table. If your trouble cannot be recovered with the remedy actions listed in the following table, malfunction of the internal circuitry is suspected; immediately unplug the power cable and contact your dealer, nearest Marantz distributor or the Marantz Service Center in your country.

SYMPTOM	CAUSE	REMEDY
SR6200 cannot be turned up.	The power plug is not connected.	Connect the power plug to the outlet.
No sound and picture are output even when power is on.	Mute is on. The input cable is not connected correctly. The master volume control is turned all the way down. The function selector position is wrong.	Cancel mute using the remote control unit. See the connection diagram and connect the cables correctly. Adjust the master volume. Select correct position.
Speaker does not outputting any sound.	The headphones are connected to the headphone jack.	Disconnect the headphones. (Speakers will not output sound when headphones are connected.)
Sound and pictures from other than equipment selected with the function selector.	Input cable connected incorrectly.	Connect the cable correctly by referring to the connection diagram.
Sound from the wrong channel is output from the speaker.	Speaker cable connected incorrectly.	Connect the cable correctly by referring to the connection diagram.
No sound is output from the center speaker.	The center speaker cable connection is incomplete. STEREO has been selected for Surround mode. Center = NONE has been selected in SETUP mode.	Connect the cable correctly. When STEREO is selected for Surround mode, no sound will be output from the center speaker. Set another Surround mode. Make the correct setting.
No sound is output from the surround speakers.	The surround speaker cable connection is incomplete. STEREO has been selected for Surround mode. Surround = NONE has been selected in SETUP mode.	Connect the cable correctly. When STEREO has been selected for Surround mode, no sound will be output from the surround speaker. Set another Surround mode. Make the correct setting.
No output to Sub Woofer Out.	Sub-woofer = NO has been selected in SETUP mode.	Select Sub-woofer = YES.
Surround mode cannot be changed.	The headphones are connected to the jack.	Disconnect the headphones. (When headphones are connected, Surround mode will be fixed to STEREO.)
Noise is produced during DTS-encoded CD or laser disc play.	Analog has been selected for input.	Be sure to perform digital connection, select digital input, then play.
DTS sources cannot be played.	Surround mode is set to DOLBY. The DVD or LD player is not DTS digital out capable.	Select other mode. Use a player which responds to DTS-digital out.
Player skips during play of a DTS source and produces noise.	Data error occurred during player skip.	Set Surround mode to DTS.
A 96kHz PCM signal cannot be played.	The disc player is not 96kHz PCM digital out capable. Surround mode is set to other than STEREO and AUTO.	Use a player that responds to 96kHz PCM digital out. Set Surround mode to STEREO or AUTO.
A normal PCM signal (CD or laser disc) cannot be played.	Surround mode is set to DTS.	Select other mode.
A Dolby Digital signal cannot be played.	Surround mode is set to DTS	Select other mode.
A specific channel does not produce output.	Nothing recorded on source.	Check the encoded channel on the source side.
FM or AM reception fails.	Antenna connection is incomplete.	Correctly connect the indoor FM and AM antennas to FM and AM antenna outlets.
Noise is heard during AM reception.	Reception is affected by other electrical fields.	Try changing location where the AM indoor antenna is set up.
Noise is heard during FM reception.	The radio waves from the broadcasting station are weak.	Install an FM outdoor antenna.
Cannot get programmed station when the PRESET button is pressed.	Preset data has been erased.	Disconnecting power plug for long periods of time will erase preset data. If that happens, input the preset data again.
Nothing appears on the remote commander display.	Batteries are consumed.	Replace all the batteries with new ones.
Control with the remote control unit fails.	Batteries are consumed.. Remote controller's function-key setting is wrong. The distance between this SR6200 and the remote commander is too far. Something is blocking SR6200 and the remote commander.	Replace all the batteries with new ones.. Select different position from which equipment will be controlled. Move closer to this SR6200. Remove offending object.

GENERAL MALFUNCTION

If the equipment malfunctions, this may be because an electrostatic discharge or AC line interference has corrupted the information in the equipment memory circuits. Therefore:

- disconnect the plug from the AC line supply
- after waiting at least three minutes, reconnect the plug to the AC line supply
- re-attempt to operate the equipment

Memory backup

- In case a power outage occurs or the power cord is accidentally unplugged, the SR6200 is equipped with a backup function to prevent memory data such as the preset memory from being erased.

The memory functions are backed up for up to about one week.

NOTE:

First of all keep SR6200 Standby or Powered-on more than 6 hours, to sufficient time for memory back up.

TECHNICAL SPECIFICATIONS

FM TUNER SECTION

Frequency Range	87.5 - 108.0 MHz
Usable Sensitivity	IHF 1.8 μ V/16.4 dBf
Signal to Noise Ratio	Mono/Stereo 76/72 dB
Distortion	Mono/Stereo 0.2/0.3 %
Stereo Separation	1 kHz 45 dB
Alternate Channel Selectivity	\pm 400 kHz 60 dB
Image Rejection	98 MHz 70 dB
Tuner Output Level	1 kHz, \pm 75 kHz Dev 800 mV

AM TUNER SECTION

Frequency Range	AM: 520 - 1710 kHz
Signal to Noise Ratio	50 dB
Usable Sensitivity	Loop 400 μ V/m
Distortion	400 Hz, 30 % Mod. 0.5 %
Selectivity	\pm 20 kHz 60 dB

AUDIO SECTION

Continuous Power Output (8 ohms / 20 Hz - 20 kHz)	
Front	110 W
Center	110 W
Surround	110 W
THD Front (20 Hz - 20 kHz)	8 ohms 0.05 %
Input Sensitivity/Impedance	
Linear	340 mV/ 47 Kohms
Signal to Noise Ratio	
Linear	105 dB

VIDEO

Television Format	NTSC
Input Level/Impedance	1 Vp-p/ 75 ohms
Output Level/Impedance	1 Vp-p/ 75 ohms
Video Frequency Response	5 Hz to 8 MHz ($-$ 1 dB)
S/N	60 dB

GENERAL

Power Requirement	AC 120 V 60 Hz
Power Consumption	3.8 A
Dimension (MAX)	
Width	17-3/8 inches (440 mm)
Height	6-1/2 inches (164 mm)
Depth	15-3/4 inches (400 mm)
Weight	32.7 lbs (14.8 Kg)
